SCAN Display

Transmitting and receiving general/distress DSC messages

By long-pressing (3 seconds) the {DISTRESS} button, DSC distress alert can be transmitted. Also, quick entry to DSC message composition screen is available by use of {DISTRESS MSG} and {OTHER DSC MSG} buttons.

For general DSC messages, press {OTHER DSC MSG} to enter the composition screen.

For DSC messages for distress alert, press {DISTRESS MSG} to enter the composition screen.

For DSC messages for DROBOSE (DSC Relay On Behalf Of Someone else), press both {DISTRESS MSG} and {OTHER DSC MSG} to enter the composition screen.

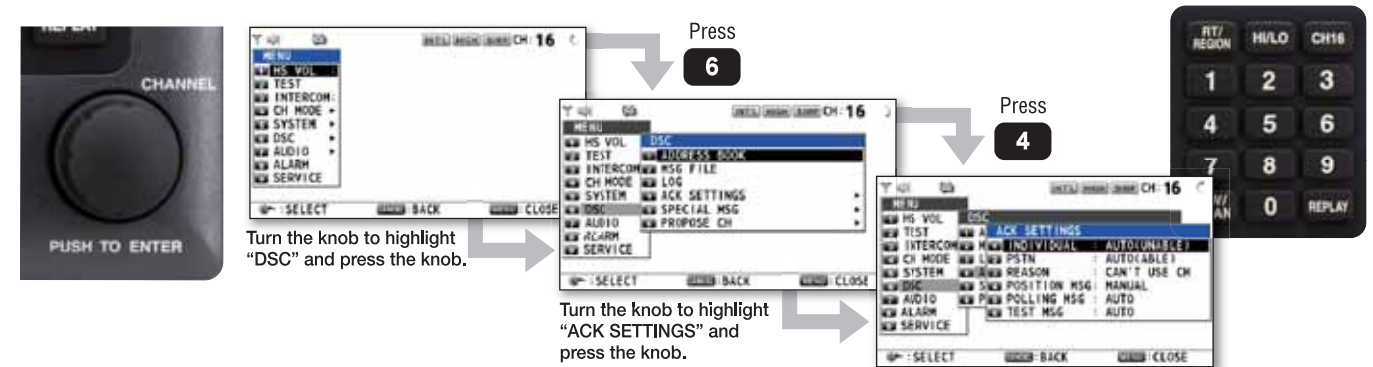

In the DSC Display, the operators can view the message log of the sent/received DSC messages.

DSC Display

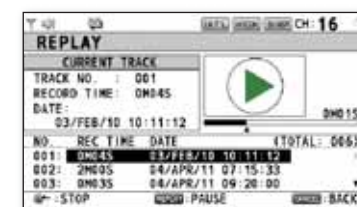

Quick access to dedicated functions in the menu operation using numeric keypad

In the menu, all tasks are assigned numbers, and the operator can access each of the menu items either by turning and pressing PUSH TO ENTER knob or simply pressing the corresponding numbers on the numeric keypad.

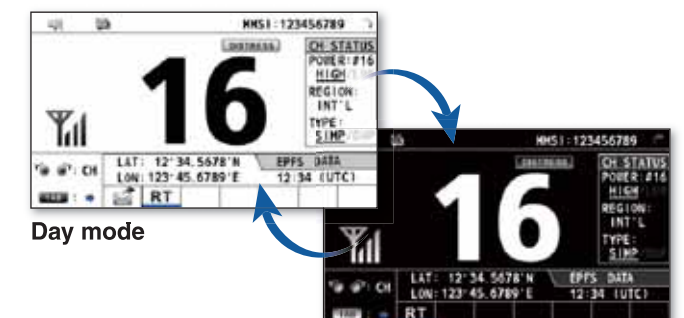

Replay function

The FM-8900S records the latest 120 seconds of incoming communication on the currently set channel. By simply pressing the "REPLAY" button on the numeric keypad, the last-received message will be played back on the spot.

Replay Display

Day mode and Night mode can be selected according to the lighting condition of the wheelhouse
